CONTROLS MIGRATION & UPGRADES

Industrial Controls & Automation
ISO 9001:2015 Certified

MIGRATIONS

Similar to upgrading but often more involved for various reasons, migrations tend to add additional challenges for companies, generally due to the age of the hardware. RASP is prepared for the typical obstacles that a company may face when choosing to migrate a system.

UPGRADES

A typical upgrade can be as simple as a single component up to a full system. While the same challenges of a migration may occur, typical upgrades are smaller in scope. Just the same, RASP is prepared for the typical obstacles that a company may face when choosing to upgrade a component or system.

CHALLENGES

- Obsolete...
  - Hardware
  - Technology
  - Software
  - Communications
  - Operating System
- No Schematics
- No Documentation
- No Passwords
- Limited Floor Space
- Limited Cabinet Space
- Non-Functional Hardware
- Non-Repairable Hardware
- Non-Compatible...
  - Hardware
  - Voltages
  - Firmware
